The department of agriculture reports that there is still in the hands of farmers the following amounts of last year's crops: Wheat, 121,000,000 bushels; corn, 783,000,000 bushels and oats, 272,000,000 bushels.

In raising a lamb from a bottle give it about a pint of milk a day and feed it every two or three hours if lamb is quite young. In the course of three or four weeks you can teach the lamb church, and the kind hearted officer to drink from a bucket which is preferable to a bottle, the bottle being so as their escort. hard to keep clean.

Unlike most snimals, sheep feed profitably in cold weather.

It would be better if horses could drink little and often in cold weather, as well as in hot days. Getting very thirsty, they take in so much at one time as to check the process of digestion, instead of assisting it, and chill the whole system beside.

It is well to harrow meadows and pastures, for it tears the roots and tends to thicken the grass. It also destroys moss which may grow on badly drained or cold groud. It is some times as essential to harrow these fields as it is to cultivate the corn

Numerous experiments have been recorded to show that moisture is saved by cultivation. During hot, dry weather every foot of plowed land should be kept well stirred on the surface with any tool which will keep it H. Vaughan. from baking. A fine surface will hold down water like a wet blanket.

A few head of good animals, whether cattle, horses or hogs, are what have been badly frightened for the produces the profit. Where a large number is reared by one breeder the personal attention given to each is the very slightest. This is especially true of horse raising, where the training and handling are superficial, aside from the training for speed.

Brood sows should have large room; lots to exercise in and good houses to sleep in and not to many in a house Do not feed them to much corn, but give them more slop. Just before farrowing time give them each a separate house and lot, cut off the corn feed, feed bran mash and a little oil meal. Note the results.

Bill known as the "resident agents" bill, which requires all fire insurance policies written in this state to be

written by a resident agent.

The governor vetoed house bill 476 Wednesday because of a glaring inac-curacy in the title of the bill. The title is "An act to repeal section 12, article 1, chapter 4, general statutes, which is section 2,025 Kentucky statutes, entitled 'Guardian and Ward.'" When looked up the body of the bill proposes to repeal chapter 48 of the neral statutes instead of chapter 4 Chapter 4 relates to deaf and dumb asylums, while section 2,025 of Kentucky statutes relates to guardian and ward, so the inconsistency makes the

Frankfort, Ky., March 18.—The governor closed business for St. Patrick's day by vetoing the bill allowing Kentucky insurance companies to in vest their surplus in other than Kentucky securities, and Mr. Hinton's bill relating to sales of real estate to satisfy incumbrances. He also signed the bill changing the time of holding common school trustee elections from June

to October. The result for the day was: Bills signed, 2; bills vetoed, 9. FRANKFORT, Ky., March 19. — The governor did not have as much raw material to work on Friday as he did Thursday, so the number of his vetoes decreased Friday to four and his approvals to one. The Covington and Newport members of the legislature will be greatly disappointed over Fri day's work, as he vetoed House Bills 234 and 248. The first named was for the benefit of incorporated districts or other municipalities not heretofore assigned to any class of towns, and was intended for the special benefit of Milldale, in Kenton county.

The reason assigned for the veto was that it was contrary to section 59 of the constitution, which provides for local legislation, and that the statute already provides a method for organiz districts. No. 248 is an act to provide for the creation and governent of suburban districts near sec nd-class cities, and was especially inended for Highlands, in Campbell county. It was vetoed for exactly the

Therefore it is in conflict with section 161 of the con-stitution.

The only bill he approved Friday was the one known as the "osteopath bill," which provides that all phyians or healers who wish to pro their profession in this state shall first be examined and granted a license by the state board of health. The presi-dent of the state board of health agreed, however, to examine the oste paths only in such branches as taught in their colleges, and this probably influenced the governor to sign the bill.

THE

Southern Mutual Investment Co.,

OF LEXINGTON, KY. OUR PLAN.

Our plan is a new application of an old principle, and is based upon the actual experience of successful life insurance companies, covering a period of over 200 years. The same principles govern both, only-WE pay while you LIVE.

THEY pay when you DIE.

WE offer the INVESTMENT features.

THEY protect in case of DEATH.

With them, death is the moving factor, causing the payment of the policy; with us, a definite and fixed mathemalical rule, in lieu of death, matures the policy.

INSURANCE IS A LAW OF AVERAGE.

They figure on so many men out of a thousand dying-we figure on so many policies, They kill the man-we kill the policy. There is no reason why a man should die to reap the ben-

fit of his investment. We return an average of \$2.30 for every dollar paid us, and yet we assume an obligation less than one-third as great as has been assumed and paid for years by the leading life insurance companies of America

OUR MISSION.

Only about twenty (20) per cent. of the people are insurable. Only the sound and healthy, who least need it's advantages, can obtain life insurance. Why should there not be a means provided whereby the other eighty (80) per cent of the population can carry an investment the same as the favored few who can get life insurance? Our mission is to open the door to the entire population to enjoy the same or greater benefits for an equal or less expenditure, considering the advantage to be derived, and that those advantages may be enjoyed during life by the one making the investment.

NOTHING SUCCEEDS LIKE SUCCESS.

That our plan is popular and based upon sound business principles, is evidenced by our large and increasing membership, as shown by our remarkable 'Exhibit of Growth, See literature.

We court the clysest scrutiny and most thoroug investigation. No statement made that cannot be verified by actual results.

Others Make Money. Why Not You?

The endorsement given this Company by the investment of bankers, law ers, merchants, ministers, doctors, railroad men, mechanics—in fact, men of business sagacity in every vocation of life-is an evidence of the soundness of

our system. ACTUAL RESULTS, AND OPINIONS OF SOME OF OUR CER-TIFICATE HOLDERS.
